

## **Social activities at 2017**

2017 was a year of building our organization.

We started two projects. Both are really hard to manage.

The first project was started by our guests Ronella Ras and Michiel van Breugel.

We are calling this project Keep Madanpur Clean.

Together with two schools we cleaned up the environment.

We also contacted organizations at Kathmandu to support us. They really like our idea but the schools give very little support. Therefore we must change our aims. This year we only will bring dustbins at some houses. By giving a good example ourselves, we hope other will follow our ideas.

Ram likes to start with computer lessons. In return for following the education the children who are following the classes must bring their carbage. The main question is how to change habits of people and make them aware of caring nature and be responsible of their garbage.

Our second project is still under construction. We are planning to give education about menstruation for teenagers. We made already wasable pads and are now writing a book.

Nowadays Ram lives at Madanpur. People notice what Nepali Children is doing and contact us for help. Therefore we hope next year 10 children will stay at Nepali Children guest house.
